BOSTON COLLEGE,

No. 761 HARRISON AVENUE,

BOSTON, MASS.

This Institution was incorporated May 25, 1863, by the State of Massachusetts with power "to confer such degrees as are usually conferred by Colleges in this Commonwealth, except medical degrees."

Schools were opened September 5th, 1864.

The terms are thirty dollars per session, payable in advance. Provision is made for the instruction of indigent, but meritorious candidates, who should present their claims for admission before the commencement of the session.

Day-scholars only are received.

Other conditions of admission are a good moral character, and a knowledge of the fundamental principles of Arithmetic and Grammar.

The academic year is divided into two sessions, the first beginning on the first Monday of September; the second, on the first Monday of February: but students are not precluded from entering at any time during the year.

The following are the ordinary holidays:

The days remaining from the close of an examination to the end of the session.

All holy-days of obligation.

1868/69-1884/85

From the twenty-third of December, to the second of the following January.

From Wednesday in Holy Week to Wednesday in Easter Week.

The feasts of St. Patrick and St. Aloysius.

Fast Day, Thanksgiving Day, the day of the Artillery Election.

Extraordinary holidays are conceded, but rarely, at the judgment of the President.

The hours of attendance are from 8½ A. M. to 2½ P. M., with recesses at convenient intervals. On Saturdays, schools close at 1 P. M.; and on eves of festivals of obligation at 12 M.

The first half-hour of each day is occupied in the celebration of Mass. One hour a day is spent in the class of Arithmetic or Mathematics; two hours a week in the study of modern languages; the rest of the time is allotted to the principal class, that of English, Latin and Greek.

The Fathers of the Society of Jesus, by whom the College is conducted, have for object to impart a religious, classical and scientific education.

The act of incorporation provides that "no student in said college shall be refused admission to, or denied any of the privileges, honors or degrees of said college on account of the religious opinions he may entertain." Students that are not Catholics will not be required to participate in any exercise distinctively Catholic; nor will any undue influence be used to induce a change of religious belief.

Catholic students will be required to hear Mass every day, unless distance of residence should furnish reason for exemption; to recite the daily catechetical lesson; to attend the weekly lecture on the doctrines of the Church, and the annual retreat; to present themselves to their confessor every month; and, if they have never received the Sacraments of Penance, Confirmation or Holy Eucharist, to prepare for their reception.

On admission, the pupil is examined to determine what classes he should enter. Subsequent progress in the course will depend altogether upon his progress in learning. From the inequality of preparation found in students entering, detention for more than a year in the lowest classes, is of more frequent occurrence. And from inequality of proficiency in the several branches, it frequently

happens that all the classes a scholar attends, do not belong to the same year; for example, that his class of Mathematics may be of the fourth year, whilst in his principal class (by which his position in the course is determined), he is rated as of the fifth.

The subjoined schedule of books and studies will show that though no provision has yet been made for an exclusively English course, the study of the English language, so far from being neglected, is greatly advanced by being pursued conjointly with that of the ancient languages.

When to the successful student is awarded the degree of Bachelor of Arts. Other degrees may be obtained on the usual conditions.

The students are expected to prepare their lessons at their homes. For this preparation two hours of study a day will ordinarily suffice.

At the end of each recitation, its quality is recorded. Six is the highest number of marks given for a written exercise; four, for a translation or analysis; two, for any other exercise, and the same number for punctuality and for good-conduct; the number being diminished by one for every fault. A copy of this record (of which an example will be found below) is furnished the parents every week.

At the end of each month the marks are summed up. If any student has gained all the marks that could have been gained, he now receives one hundred; and others in proportion. The list of these new marks is read publicly; and those who, according to this list, are marked above a fixed number (usually about ninety or ninety-five), are rewarded with tickets, and the award is published in the *Boston Pilot*.

At the end of each session an examination is held of all that was studied during the session. A separate examiner is assigned to each class. The examination is conducted in writing, and lasts for about two weeks. In each branch, usually ten questions are proposed, so chosen as to be, as nearly as possible, exhaustive of the subject. Each examination paper is rated as were the daily lessons, six, four or two, if perfect, and inferior papers in proportion. The results of the whole examination of each student in the class are summed up, as the monthly lists were prepared; that is, the student whose examination is faultless is marked one hundred; and others in proportion.

At the Annual Exhibition, distinctions of three degrees are conferred, medals, books, or mere honorary mention. In the classes of Arithmetic, Book-keeping, French and German, at the Exhibition of 1869, ninety-five marks were required to obtain a medal; eighty-seven and five-tenths, for a premium; and eighty for honorary mention. In the other classes the requisite numbers were ninety-three, eighty-eight and eighty-three. For this decision the

sums of the monthly marks of each of the two sessions, and the results of each of the two examinations, enter into computation as four equal elements. For absolute perfection in all four, one hundred marks are now again given; inferior success is rated in proportion, and according to this last list the prizes are awarded. For the better comprehension of the system, an example will be given.

In addition, annual prizes have been instituted of fifty dollars in gold for the best English Composition, twenty-five dollars in gold for excellence in Reading, and the same amount for excellence in Declamation. For these, all the students are allowed to compete, except scholars of the first year, and those to whom the prize may have been previously awarded.

When religious motives are continually appealed to, less need is experienced of frequent or severe punishments.

Flagrant offences, such as are detrimental to the reputation of the College, or are obstructive of the good of the pupils, are grounds for expulsion.

For faults of ordinary occurrence, — such as tardy arrival, failure in recitations, or minor instances of misconduct, — a task, consisting of lines from some classical author, is committed to memory during the hour after the close of school.

Connected with the College is a Library, where, with the advantage of their teacher's direction, and at a trifling expense, the students may supply themselves with those books whose perusal is judged necessary for the completeness of their education. The liberality of a friend has already furnished a collection of minerals. A gymnasium has been begun, and an ample cabinet of philosophical instruments will be in readiness for the graduating class.

The days remaining from the close of an examination to the end of the session.

All the holy-days of obligation.

From the twenty-third of December, to the second of the following January.

From Wednesday in Holy Week to Wednesday in Easter Week.

The Feasts of St. Patrick and St. Aloysius.

Fast Day, Thanksgiving Day, the day of the Artillery Election.

Extraordinary holidays are conceded, but rarely, at the judgment of the President.

The hours of attendance are from 8½ A. M. to 2½ P. M., with recesses at convenient intervals. On Saturdays, schools close at 1 P. M.; and on eves of festivals of obligation, at 12 M.

The first half-hour of each day is occupied in the celebration of Mass. One hour a day is spent in the class of Arithmetic, or Mathematics; two hours a week in the study of modern languages; the rest of the time is allotted to the principal class, that of English, Latin and Greek.

The Fathers of the Society of Jesus, by whom the College is conducted, have for object to impart a religious, classical and scientific education.

The act of incorporation provides that "no student in said college shall be refused admission to, or denied any of the privileges, honors or degrees of said college on account of the religious opinions he may entertain." Students that are not Catholics will not be required to participate in any exercise distinctively Catholic; nor will any undue influence be used to induce a change of religious belief.

Catholic students will be required to hear Mass every day, unless distance of residence should furnish reason for exemption; to recite the daily catechetical lesson; to attend the weekly lecture on the doctrines of the Church, and the annual retreat; to present themselves to their confessor every month; and, if they have never received the Sacraments of Penance, Confirmation or Holy Eucharist, to prepare for their reception.

On admission, the pupil is examined, to determine what classes he should enter. Subsequent progress in the course will depend altogether upon his progress in learning. From the inequality of preparation found in students entering, detention for more than a year in the lowest classes, is of more frequent occurrence. And from inequality of proficiency in the several branches, it often happens that all the classes a scholar attends, do not belong to the same year; for example, that his class of Mathematics may be of

the fourth year, whilst in his principal class (by which his position in the course is determined) he is rated as of the fifth.

The subjoined schedule of books and studies will show that though no provision has yet been made for an exclusively English course, the study of the English language, so far from being neglected, is greatly advanced by being pursued conjointly with that of the ancient languages.

When to the successful student is awarded the degree of Bachelor of Arts. Other degrees may be obtained on the usual conditions.

The students are expected to prepare their lessons at their homes. For this preparation, two hours of study a day will ordinarily suffice.

At the end of each recitation, its quality is recorded. Six is the highest number of marks given for a written exercise; four for a translation or analysis; two for any other exercise, and the same number for punctuality and for good conduct; the number being diminished by one for every fault. A copy of this record (of which an example will be found below,) is furnished the parents every week.

At the end of each month the marks are summed up. If any student has gained all the marks that could have been gained, he now receives one hundred; and others in proportion. The list of these new marks is read publicly; and those who, according to this list, are marked above a fixed number (usually about ninety or ninety-five), are rewarded with tickets, and the award is published in the *Boston Pilot*.

At the end of each session, an examination is held of all that was studied during the session. A separate examiner is assigned to each class. The examination is conducted in writing, and lasts for about two weeks. In each branch, usually ten questions are proposed, so chosen as to be, as nearly as possible, exhaustive of the subject. Each examination paper is rated as were the daily lessons, six, four or two, if perfect, and inferior papers in proportion. The results of the whole examination of each student in the class are summed up, as the monthly lists were prepared; that is, the student whose examination is faultless is marked one hundred; and others in proportion.

At the Annual Exhibition, distinctions of three degrees are conferred, medals, books, or mere honorary mention. In the classes of Arithmetic, Algebra, Book-keeping and French, at the Exhibition of 1879, ninety-six marks were required to obtain a medal; ninety-one for a premium; and eighty-one for honorary mention. In the other classes, the requisite numbers were ninety-four, eighty-nine and seventy-nine. For this decision, the sums of the monthly marks of each of the two sessions, and the re-

sults of each of the two examinations, enter into computation as four equal elements. For absolute perfection in all four, one hundred marks are now again given; inferior success is rated in proportion, and according to this last list the prizes are awarded. For the better comprehension of the system, an example will be given.

In addition, annual prizes have been instituted with the following conditions: —

Fifty dollars in gold will be divided equally among such as pass perfect examinations in the whole of the Arithmetic: those being excluded from the competition who belong to the Mathematical Department, and those who have spent more than one year in the first class of Arithmetic.

Fifty dollars in gold will be awarded for the best English prose composition.

Twenty-five dollars in gold for excellence in Reading, and the same amount for excellence in Declamation. For the last three prizes all are allowed to compete, except scholars of the first year, and those on whom the same reward may have been previously conferred.

When religious motives are continually appealed to, less need is experienced of frequent or severe punishment

Flagrant offences, such as are detrimental to the reputation of the College, or are obstructive of the good of the pupils, are grounds for expulsion.

For faults of ordinary occurrence, — such as tardy arrival, failure in recitations, or minor instances of misconduct, — a task, consisting of lines from some classical author, is committed to memory after the close of school.

Connected with the College is a Library, where, with the advantage of their teacher's direction, and at a trifling expense, the students may supply themselves with those books whose perusal is judged necessary for the completeness of their education. The liberality of a friend has already furnished a collection of minerals. A gymnasium has been begun, and an ample cabinet of philosophical instruments will be in readiness for the graduating class. The State authorities having granted a supply of arms, a drill-master will be appointed, and due notice will be given as to the style of the uniform, and the time by which it must be procured.

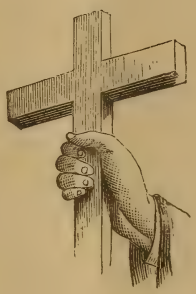
BOSTON COLLEGE

FOR THE

ACADEMIC YEAR 1870-71.



BOSTON:

A. M. D. G.

BOSTON COLLEGE,

No. 761 HARRISON AVENUE,

BOSTON, MASS.

This Institution was incorporated May 25, 1863, by the State of Massachusetts, with power "to confer such degrees as are usually conferred by Colleges in this Commonwealth, except medical degrees."

Schools were opened September 5th, 1864.

The terms are thirty dollars per session, payable in advance. Provision is made for the instruction of indigent, but meritorious candidates, who should present their claims for admission before the commencement of the session.

Day-scholars only are received.

Other conditions of admission are a good moral character, and a knowledge of the fundamental principles of Arithmetic and Grammar.

The academic year is divided into two sessions, the first beginning on the first Monday of September; the second, on the first Monday of February; but students are not precluded from entering at any time during the year.

The following are the ordinary holidays: —

The days remaining from the close of an examination to the end of the session.

All the holy-days of obligation.

From the twenty-third of December, to the second of the following January.

From Wednesday in Holy Week to Wednesday in Easter Week.

The Feasts of St. Patrick and St. Aloysius.

Fast Day, Thanksgiving Day, the day of the Artillery Election.

Extraordinary holidays are conceded, but rarely, at the judgment of the President.

The hours of attendance are from 8½ A. M. to 2½ P. M., with recesses at convenient intervals. On Saturdays, schools close at 1 P. M.; and on eves of festivals of obligation, at 12 M.

The first half-hour of each day is occupied in the celebration of Mass. One hour a day is spent in the class of Arithmetic, or Mathematics; two hours a week in the study of Modern Languages; the rest of the time is allotted to the principal class, that of English, Latin, and Greek.

The Fathers of the Society of Jesus, by whom the College is conducted, have for object to impart a religious, classical, and scientific education.

The act of incorporation provides that "no student in said college shall be refused admission to, or denied any of the privileges, honors or degrees of said college on account of the religious opinions he may entertain." Students that are not Catholics will not be required to participate in any exercise distinctively Catholic; nor will any undue influence be used to induce a change of religious belief.

Catholic students will be required to hear Mass every day, unless distance of residence should furnish reason for exemption; to recite the daily catechetical lesson; to attend the weekly lecture on the doctrines of the Church, and the annual retreat; to present themselves to their confessor every month; and, if they have never received the Sacraments of Penance, Confirmation or Holy Eucharist, to prepare for their reception.

On admission, the pupil is examined, to determine what classes he should enter. Subsequent progress in the course will depend altogether upon his progress in learning. From the inequality of preparation found in students entering, detention for more than a year in the lowest classes, is of more frequent occurrence. And from inequality of proficiency in the several branches, it often happens that all the classes a scholar attends, do not belong to the same year; for example, that his class of Mathematics may be of

the fourth year, whilst in his principal class (by which his position in the course is determined) he is rated as of the fifth.

The subjoined schedule of books and studies will show that though no provision has yet been made for an exclusively English course, the study of the English language, so far from being neglected, is greatly advanced by being pursued conjointly with that of the ancient languages.

When to the successful student is awarded the degree of Bachelor of Arts. Other degrees may be obtained on the usual conditions.

The students are expected to prepare their lessons at their homes. For this preparation, two hours of study a day will ordinarily suffice.

At the end of each recitation, its quality is recorded. Six is the highest number of marks given for a written exercise; four for a translation or analysis; two for any other exercise, and the same number for punctuality and for good conduct; the number being diminished by one for every fault. A copy of this record (of which an example will be found below) is furnished the parents every week.

At the end of each month the marks are summed up. If any student has gained all the marks that could have been gained, he now receives one hundred; and others in proportion. The list of these new marks is read publicly; and those who, according to this list, are marked above a fixed number (usually about ninety or ninety-five), are rewarded with tickets, and the award is published in the *Boston Pilot*.

At the end of each session, an examination is held of all that was studied during the session. A separate examiner is assigned to each class. The examination is conducted in writing, and lasts for about two weeks. In each branch, usually ten questions are proposed, so chosen as to be, as nearly as possible, exhaustive of the subject. Each examination paper is rated as were the daily lessons, six, four and two, if perfect, and inferior papers in proportion. The results of the whole examination of each student in the class are summed up, as the monthly lists were prepared; that is, the student whose examination is faultless is marked one hundred; and others in proportion.

At the Annual Exhibition, distinctions of three degrees are conferred, medals, books, or mere honorary mention. In the classes of Arithmetic, Algebra, Book-keeping and French, at the Exhibition of 1870, ninety-six marks were required to obtain a medal; ninety-one for a premium; and eighty-one for honorary mention. In the other classes, the requisite numbers were ninety-four, eighty-nine and seventy-nine. For this decision, the sums of the monthly marks of each of the two sessions, and the re-

sults of each of the two examinations, enter into computation as four equal elements. For absolute perfection in all four, one hundred marks are now again given; inferior success is rated in proportion, and according to this last list the prizes are awarded. For the better comprehension of the system, an example will be given.

In addition, annual prizes have been instituted with the following conditions: —

Fifty dollars in gold will be divided equally among such as pass perfect examinations in the whole of the Arithmetic: those being excluded from the competition who belong to the Mathematical Department, and those who have spent more than one year in the first class of Arithmetic.

Fifty dollars in gold will be awarded for the best English prose composition.

Twenty-five dollars in gold for excellence in Reading, and the same amount for excellence in Declamation. For the last three prizes all are allowed to compete, except scholars of the first year, and those on whom the same reward may have been previously conferred.

When religious motives are continually appealed to, less need is experienced of frequent or severe punishment.

Flagrant offences, such as are detrimental to the reputation of the College, or are obstructive of the good of the pupils, are grounds for expulsion.

For faults of ordinary occurrence, — such as tardy arrival, failure in recitations, or minor instances of misconduct, — a task, consisting of lines from some classical author, is committed to memory after the close of the school.

Connected with the College is a Library, where, with the advantage of their teacher's direction, and at a trifling expense, the students may supply themselves with those books whose perusal is judged necessary for the completeness of their education. The liberality of a friend has already furnished a collection of minerals. A gymnasium has been begun, and an ample cabinet of philosophical instruments will be in readiness for the graduating class.

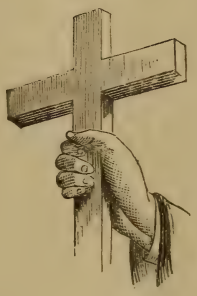
BOSTON COLLEGE

FOR THE

ACADEMIC YEAR 1871-2.



BOSTON:
ALFRED MUDGE & SON, PRINTERS, 34 SCHOOL STREET.
1872.

A. M. D. G.

BOSTON COLLEGE,

No. 761 HARRISON AVENUE,

BOSTON, MASS.

This Institution was incorporated May 25, 1863, by the State of Massachusetts, with power "to confer such degrees as are usually conferred by colleges in this Commonwealth, except medical degrees."

Schools were opened September 5, 1864.

The terms are thirty dollars per session, payable in advance. Provision is made for the instruction of indigent, but meritorious candidates, who should present their claims for admission before the commencement of the session.

Day-scholars only are received.

Other conditions of admission are a good moral character, and a knowledge of the fundamental principles of Arithmetic and Grammar.

The academic year is divided into two sessions, the first beginning on the first Monday of September; the second, on the first Monday of February; but students are not precluded from entering at any time during the year.

The following are the ordinary holidays: —

The days remaining from the close of an examination to the end of the session.

All the holy-days of obligation.

From the twenty-third of December to the second of the following January.

From Wednesday in Holy Week to Wednesday in Easter Week.

The Feasts of St. Patrick and St. Aloysius.

Fast Day, Thanksgiving Day, the day of the Artillery Election.

Extraordinary holidays are conceded, but rarely, at the judgment of the President.

The hours of attendance are from $8\frac{1}{2}$ A. M. to $2\frac{1}{2}$ P. M., with recesses at convenient intervals. On Saturdays, schools close at 1 P. M.; and on eves of festivals of obligation, at 12 M.

The first half-hour of each day is occupied in the celebration of Mass. One hour a day is spent in the class of Arithmetic, or Mathematics; two hours a week in the study of Modern Languages; the rest of the time is allotted to the principal class, that of English, Latin, and Greek.

The Fathers of the Society of Jesus, by whom the College is conducted, have for object to impart a religious, classical, and scientific education.

The act of incorporation provides that "no student in said college shall be refused admission to, or denied any of the privileges, honors or degrees of said college on account of the religious opinions he may entertain." Students that are not Catholics will not be required to participate in any exercise distinctively Catholic; nor will any undue influence be used to induce a change of religious belief.

Catholic students will be required to hear Mass every day, unless distance of residence should furnish reason for exemption; to recite the daily catechetical lesson; to attend the weekly lecture on the doctrines of the Church, and the annual retreat; to present themselves to their confessor every month; and, if they have never received the Sacraments of Penance, Confirmation or Holy Eucharist, to prepare for their reception.

On admission, the pupil is examined, to determine what classes he should enter. Subsequent progress in the course will depend altogether upon his progress in learning. From the inequality of preparation found in students entering, detention for more than a year in the lowest classes, is of more frequent occurrence. And from inequality of proficiency in the several branches, it often happens that all the classes a scholar attends, do not belong to the same year; for example, that his class of Mathematics may be of

the fourth year, whilst in his principal class (by which his position in the course is determined) he is rated as of the fifth.

The subjoined schedule of books and studies will show that though no provision has yet been made for an exclusively English course, the study of the English language, so far from being neglected, is greatly advanced by being pursued conjointly with that of the ancient languages.

When to the successful student is awarded the degree of Bachelor of Arts. Other degrees may be obtained on the usual conditions.

The students are expected to prepare their lessons at their homes. For this preparation, two hours of study a day will ordinarily suffice.

The system of computing marks for honors has been explained in previous catalogues, and need not now be repeated.

Should parents fail to receive the weekly report of proficiency, and should there be no evidently satisfactory reason to account for the failure, they are earnestly requested to notify the teacher.

In addition to the customary rewards, annual prizes have been instituted with the following conditions: —

Fifty dollars in gold will be divided equally among such as pass perfect examinations in the whole of the Arithmetic: those being excluded from the competition who belong to the Mathematical Department, and those who have spent more than one year in the first class of Arithmetic.

Two purses of twenty-five dollars in gold, each, will be awarded for perfect examinations in the second and third classes of arithmetic.

Fifty dollars in gold will be awarded for the best English prose composition.

Twenty-five dollars in gold for excellence in Reading, and the same amount for excellence in Declamation. For the last three prizes all are allowed to compete, except scholars of the first year, and those on whom the same award may have been previously conferred.

When religious motives are continually appealed to, less need is experienced of frequent or severe punishment.

Flagrant offences, such as are detrimental to the reputation of the College, or are obstructive of the good of the pupils, are grounds for expulsion.

For faults of ordinary occurrence,— such as tardy arrival, failure in recitations, or minor instances of misconduct, — a task, consisting of lines from some classical author, is committed to memory after the close of the school.

Henceforth it will be of obligation to procure the College uniform.

Connected with the College is a Library, where, with the advantage of their teacher's direction, and at a trifling expense, the students may supply themselves with those books whose perusal is judged necessary for the completeness of their education. The liberality of a friend has already furnished a collection of minerals. A gymnasium has been begun, and an ample cabinet of philosophical instruments will be in readiness for the graduating class.

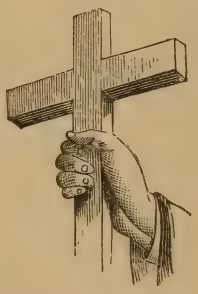
BOSTON COLLEGE

FOR THE

ACADEMIC YEAR 1872-3.



BOSTON:
ALFRED MUDGE & SON, PRINTERS, 34 SCHOOL STREET.
1873.

A. M. D. G.

BOSTON COLLEGE,

No. 761 HARRISON AVENUE,

BOSTON, MASS.

This Institution was incorporated May 25, 1863, by the State of Massachusetts, with power "to confer such degrees as are usually conferred by colleges in this Commonwealth, except medical degrees."

Schools were opened September 5, 1864.

The terms are thirty dollars per session, payable in advance. Provision is made for the instruction of indigent, but meritorious candidates, who should present their claims for admission before the commencement of the session.

Day-scholars only are received.

Other conditions of admission are a good moral character, and a knowledge of the fundamental principles of Arithmetic and Grammar.

The academic year is divided into two sessions, the first beginning on the first Monday of September; the second, on the first Monday of February; but students are not precluded from entering at any time during the year.

The following are the ordinary holidays: —

The days remaining from the close of an examination to the end of the session.

All the holy-days of obligation.

From the twenty-third of December to the second of the following January.

From Wednesday in Holy Week to Wednesday in Easter Week.

The Feasts of St. Patrick and St. Aloysius.

Fast Day, Thanksgiving Day, the day of the Artillery Election.

Extraordinary holidays are conceded, but rarely, at the judgment of the President

The hours of attendance are from 8½ A. M. to 2½ P. M., with recesses at convenient intervals. On Saturdays, schools close at 1 P M.; and on eves of festivals of obligation, at 12 M.

The first half-hour of each day is occupied in the celebration of Mass. One hour a day is spent in the class of Arithmetic, or Mathematics; two hours a week in the study of Modern Languages; the rest of the time is allotted to the principal class, that of English, Latin, and Greek.

The Fathers of the Society of Jesus, by whom the College is conducted, have for object to impart a religious, classical, and scientific education.

The act of incorporation provides that "no student in said college shall be refused admission to, or denied any of the privileges, honors or degrees of said college on account of the religious opinions he may entertain" Students that are not Catholics will not be required to participate in any exercise distinctively Catholic; nor will any undue influence be used to induce a change of religious belief.

Catholic students will be required to hear Mass every day, unless distance of residence should furnish reason for exemption; to recite the daily catechetical lesson; to attend the weekly lecture on the doctrines of the Church, and the annual retreat; to present themselves to their confessor every month; and if they have never received the Sacraments of Penance, Confirmation or Holy Eucharist, to prepare for their reception.

On admission, the pupil is examined, to determine what classes he should enter. Subsequent progress in the course will depend altogether upon his progress in learning. From the inequality of preparation found in students entering, detention for more than a year in the lowest classes, is of more frequent occurrence. And from inequality of proficiency in the several branches, it often happens that all the classes a scholar attends, do not belong to the same year; for example, that his class of Mathematics may be of

the fourth year, whilst in his principal class (by which his position in the course is determined) he is rated as of the fifth.

The subjoined schedule of books and studies will show that though no provision has yet been made for an exclusively English course, the study of the English language, so far from being neglected, is greatly advanced by being pursued conjointly with that of the ancient languages.

When to the successful student is awarded the degree of Bachelor of Arts. Other degrees may be obtained on the usual conditions.

The students are expected to prepare their lessons at their homes. For this preparation, two hours of study a day will ordinarily suffice.

The system of computing marks for honors has been explained in previous catalogues, and need not now be repeated.

Should parents fail to receive the monthly report of proficiency, and should there be no evidently satisfactory reason to account for the failure, they are earnestly requested to notify the teacher.

In addition to the customary rewards, annual prizes have been instituted with the following conditions: —

Fifty dollars in gold will be divided equally among such as pass perfect examinations in the whole of the arithmetic: those being excluded from the competition who belong to the Mathematical Department, and those who have spent more than one year in the first class of Arithmetic.

Two purses of twenty-five dollars in gold, each, will be awarded for perfect examinations in the second and third classes of arithmetic.

Fifty dollars in gold will be awarded for the best English prose composition.

Twenty-five dollars in gold for excellence in Reading, and the same amount for excellence in Declamation. For the last three prizes all are allowed to compete, except scholars of the first year, and those on whom the same award may have been previously conferred.

When religious motives are continually appealed to, less need is experienced of frequent or severe punishment.

Flagrant offences, such as are detrimental to the reputation of the College, or are obstructive of the good of the pupils, are grounds for expulsion.

For faults of ordinary occurrence, — such as tardy arrival, failure in recitations, or minor instances of misconduct, — a task, consisting of lines from some classical author, is committed to memory after the close of the school.

Henceforth it will be of obligation to procure the College uniform.

Connected with the College is a Library, where, with the advantage of their teacher's direction, and at a trifling expense, the students may supply themselves with those books whose perusal is judged necessary for the completeness of their education. The liberality of a friend has already furnished a collection of minerals. A gymnasium has been begun, and an ample cabinet of philosophical instruments will be in readiness for the graduating class.

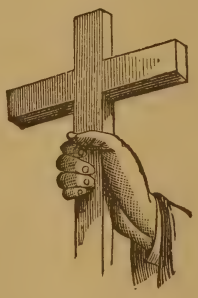
BOSTON COLLEGE

FOR THE

ACADEMIC YEAR 1874-75.



BOSTON:
ALFRED MUDGE & SON, PRINTERS, 34 SCHOOL STREET.
1875.

A. M. D. G.

BOSTON COLLEGE,

NO. 761 HARRISON AVENUE,

BOSTON, MASS.

This Institution was incorporated May 25, 1863, by the State of Massachusetts, with power "to confer such degrees as are usually conferred by colleges in this Commonwealth, except medical degrees."

Schools were opened September 5, 1864.

The terms are thirty dollars per session, payable in advance. Provision is made for the instruction of indigent but meritorious candidates, who should present their claims for admission before the commencement of the session.

Day-scholars only are received.

Other conditions of admission are a good moral character, and a knowledge of the fundamental principles of Arithmetic and Grammar.

The academic year is divided into two sessions, the first beginning on the first Monday of September; the second, on the first Monday of February; but students are not precluded from entering at any time during the year.

The following are the ordinary holidays: —

The days remaining from the close of an examination to the end of the session.

All the holy-days of obligation.

From the twenty-third of December to the second of the following January.

From Wednesday in Holy Week to Wednesday in Easter Week.

The feasts of St. Patrick and St. Aloysius.

Fast Day, Thanksgiving Day, the day of the Artillery Election.

Extraordinary holidays are conceded, but rarely, at the judgment of the President.

The hours of attendance are from 8½ A. M. to 2½ P. M., with recesses at convenient intervals. On Saturdays, schools close at 1 P. M.; and on eves of festivals of obligation, at 12 M.

The first half-hour of each day is occupied in the celebration of Mass. One hour a day is spent in the class of Arithmetic, or Mathematics; two hours a week in the study of Modern Languages; the rest of the time is allotted to the principal class, that of English, Latin, and Greek.

The Fathers of the Society of Jesus, by whom the College is conducted, have for object to impart a religious, classical and scientific education.

The Act of Incorporation provides that "no student in said College shall be refused admission to, or denied any of the privileges, honors, or degrees of said College on account of the religious opinions he may entertain." Students who are not Catholics will not be required to participate in any exercise distinctively Catholic; nor will any undue influence be used to induce a change of religious belief.

Catholic students will be required to hear Mass every day, unless distance of residence should furnish reason for exemption; to recite the daily catechetical lesson; to attend the weekly lecture on the doctrines of the Church, and the annual retreat; to present themselves to their confessor every month; and if they have never received the sacraments of Penance, Confirmation, or Holy Eucharist, to prepare for their reception.

On admission, the pupil is examined, to determine what classes he should enter. Subsequent progress in the course will depend altogether upon his progress in learning. From the inequality of preparation found in students entering, detention for more than a year in the lowest classes is of more frequent occurrence. And from inequality of proficiency in the several branches, it often happens that all the classes a scholar attends do not belong to the same year; for example, that his class of Mathematics may be of

the fourth year, whilst in his principal class (by which his position in the course is determined) he is rated as of the fifth.

The subjoined schedule of books and studies will show that though no provision has yet been made for an exclusively English course, the study of English, so far from being neglected, is greatly advanced by being pursued conjointly with that of the ancient languages.

When to the successful student is awarded the degree of Bachelor of Arts. Other degrees may be obtained on the usual conditions.

The students are expected to prepare their lessons at their homes. For this preparation, two hours of study a day will ordinarily suffice.

Should parents fail to receive the monthly report of proficiency, and should there be no evidently satisfactory reason to account for the failure, they are earnestly requested to notify the teacher.

In addition to the customary rewards, annual prizes have been instituted with the following conditions: —

Fifty dollars in gold will be divided equally among such as pass perfect examinations in the whole of the Arithmetic; those being excluded from the competition who belong to the Mathematical Department, and those who have spent more than one year in the first class of Arithmetic.

Two purses of twenty-five dollars in gold, each, will be awarded for perfect examinations in the second and third classes of Arithmetic.

Fifty dollars in gold will be awarded for the best English prose composition.

Two purses, one of thirty dollars in gold, the other of twenty, will be awarded for the best theses on some point of Christian doctrine.

Twenty-five dollars in gold for excellence in Reading, and the same amount for excellence in Declamation. For the last three prizes all are allowed to compete, except scholars of the first year, and those on whom the same award may have been previously conferred.

When religious motives are continually appealed to, less need is experienced of frequent or severe punishment.

Flagrant offences, such as are detrimental to the reputation of the College, or are obstructive of the good of the pupils, are grounds for expulsion.

For faults of ordinary occurrence, — such as tardy arrival, failure in recitations, or minor instances of misconduct, — a task, consisting of lines from some classical author, is committed to memory after the close of the school.

Henceforth it will be of obligation to procure the College uniform.

Connected with the College is a Library, where, with the advantage of their teacher's direction, and at a trifling expense, the students may supply themselves with those books whose perusal is judged necessary for the completeness of their education.

During the past year the College edifice has been extended and otherwise improved, so that, of buildings devoted to such purposes, it is surpassed by few, if any, in the country. The improvements embrace a gymnasium, which serves also for recreation and drill, lecture-room, cloak-room, music-room, additional school-rooms, parlor, hall, and greater facilities for ventilating and heating.

Besides the prizes, elsewhere mentioned, several thousand volumes have been contributed to the Library by the late Rev. Stanislas Buteux, and one thousand dollars by a gentleman who wishes to remain unknown.

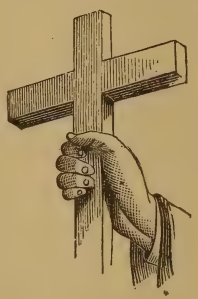
OFFICERS AND STUDENTS

OF

BOSTON COLLEGE

FOR THE

ACADEMIC YEAR 1875-76.



BOSTON:
ALFRED MUDGE & SON, PRINTERS, 34 SCHOOL STREET.
1876.

A. M. D. G.

BOSTON COLLEGE,

NO. 761 HARRISON AVENUE,

BOSTON, MASS.

This Institution was incorporated May 25, 1863, by the State of Massachusetts, with power "to confer such degrees as are usually conferred by colleges in this Commonwealth, except medical degrees."

Schools were opened September 5, 1864.

The terms are thirty dollars per session, payable in advance. Provision is made for the instruction of indigent but meritorious candidates, who should present their claims for admission before the commencement of the session.

Day-scholars only are received.

Other conditions of admission are a good moral character, and a knowledge of the fundamental principles of Arithmetic and Grammar.

The academic year is divided into two sessions, the first beginning on the first Monday of September, the second on the first Monday of February; but students are not precluded from entering at any time during the year.

The following are the ordinary holidays: —

The days remaining from the close of an examination to the end of the session.

All the holy-days of obligation.

From the twenty-third of December to the second of the following January.

From Wednesday in Holy Week to Wednesday in Easter Week.

The feasts of St. Patrick and St. Aloysius.

Fast Day, Thanksgiving Day, the day of the Artillery Election.

Extraordinary holidays are conceded, but rarely, at the judgment of the President.

The hours of attendance are from 8½ A. M. to 2½ P. M., with recesses at convenient intervals. On Saturdays, schools close at 1 P. M.; and on eves of festivals of obligation, at 12 M.

The first half-hour of each day is occupied in the celebration of Mass. One hour a day is spent in the class of Arithmetic, or Mathematics; two hours a week in the study of Modern Languages; the rest of the time is allotted to the principal class, that of English, Latin and Greek.

The Fathers of the Society of Jesus, by whom the College is conducted, have for object to impart a religious, classical and scientific education.

The Act of Incorporation provides that "no student in said College shall be refused admission to, or denied any of the privileges, honors, or degrees of said College on account of the religious opinions he may entertain." Students who are not Catholics will not be required to participate in any exercise distinctively Catholic, nor will any undue influence be used to induce a change of religious belief.

Catholic students will be required to hear Mass every day, unless distance of residence should furnish reason for exemption; to recite the daily catechetical lesson; to attend the weekly lecture on the doctrines of the Church, and the annual retreat; to present themselves to their confessor every month; and if they have never received the sacraments of Penance, Confirmation, or Holy Eucharist, to prepare for their reception.

On admission, the pupil is examined, to determine what classes he should enter. Subsequent progress in the course will depend altogether upon his progress in learning From the inequality of preparation found in students entering, detention for more than a year in the lowest classes is of frequent occurrence. And from inequality of proficiency in the several branches, it often happens that all the classes a scholar attends do not belong to the same year; for example, that his class of Mathematics may be of

the fourth year, whilst in his principal class (by which his position in the course is determined) he is rated as of the fifth.

The subjoined schedule of books and studies will show that though no provision has yet been made for an exclusively English course, the study of English, so far from being neglected, is greatly advanced by being pursued conjointly with that of the ancient languages.

When to the successful student is awarded the degree of Bachelor of Arts. Other degrees may be obtained on the usual conditions.

The students are expected to prepare their lessons at their homes. For this preparation, two hours of study a day will ordinarily suffice.

Should parents fail to receive the monthly report of proficiency, and should there be no evidently satisfactory reason to account for the failure, they are earnestly requested to notify the teacher.

In addition to the customary rewards, annual prizes have been instituted with the following conditions: —

Fifty dollars in gold will be divided equally among such as pass perfect examinations in the whole of the Arithmetic; those being excluded from the competition who belong to the Mathematical Department, and those who have spent more than one year in the first class of Arithmetic.

Two purses of twenty-five dollars in gold, each, will be awarded for perfect examinations in the second and third classes of Arithmetic.

Fifty dollars in gold will be awarded for the best English prose composition.

Two purses, one of thirty dollars in gold, the other of twenty, will be awarded for the best theses on some point of Christian doctrine.

Twenty-five dollars in gold for excellence in Reading, and the same amount for excellence in Declamation. For the last five prizes all are allowed to compete, except scholars of the first year, and those on whom the same award may have been previously conferred.

When religious motives are continually appealed to, less need is experienced of frequent or severe punishment.

Flagrant offences, such as are detrimental to the reputation of the College, or are obstructive of the good of the pupils, are grounds for expulsion.

For faults of ordinary occurrence, — such as tardy arrival, failure in recitations, or minor instances of misconduct, — a task, consisting of lines from some classical author, is committed to memory after the close of the school.

It is of obligation to procure the College uniform.

Connected with the College is a Library, where, with the advantage of their teacher's direction, and at a trifling expense, the students may supply themselves with those books whose perusal is judged necessary for the completeness of their education.

The Faculty acknowledge their indebtedness to several friends for donations of prizes, and to Charles Rollin Brainard, Esq., for additional contributions to the Museum of Natural History.

BOSTON COLLEGE,

BOSTON, MASS.

This Institution, under the care of Fathers of the Society of Jesus, was incorporated May 25, 1863, by the State of Massachusetts, with power "to confer such degrees as are usually conferred by colleges in this Commonwealth, except medical degrees." Schools were opened Sept. 5, 1864.

It is intended for day scholars only.

The Act of Incorporation provides that "no student of said College shall be refused admission to, or denied any of the privileges, honors, or degrees of said College on account of the religious opinions he may entertain." Students who are not Catholics will not be required to participate in any distinctively Catholic exercise, nor will any undue influence be exerted to induce a change of religious belief. But though no difference of creed will be a bar to admission, evidence will be demanded of the candidate to prove the possession of a good moral character.

To the former classical course, next September, at the earnest solicitation of the Most Reverend Archbishop, will be added a department in which the study of the ancient languages will be superseded by exclusive application to English, the modern languages, and the sciences.

For entrance into the classical department, a knowledge of the fundamental principles of Grammar and Arithmetic will suffice;

for entrance into the English department, a complete knowledge of those two branches will be exacted.

The terms are thirty dollars per session of five months; besides the fee of ten dollars for the diploma, there will be no further expense for tuition.

The first session begins on the first Monday of September; the second, on the first Monday of February; but students are not precluded from entering at other times.

The following are the ordinary holidays: —

Every Saturday.

The days of a session remaining after the close of an examination.

All the holy-days of obligation.

From the 23d of December to the 2d of January.

From Wednesday in Holy Week to Wednesday in Easter Week.

The feasts of St. Patrick and St. Aloysius.

Fast Day, Thanksgiving Day.

Except that attendance will be required for a short time on the first and second Saturdays of the month, not for class recitations, but for certain religious or literary exercises.

The hours of school are from 8½ A. M. to 2 P. M., with recesses at convenient intervals. Distance of residence will be considered sufficient excuse for a later arrival, and during the progress of the examinations the time for closing will be somewhat anticipated.

On admission, the pupil is examined, to determine what classes he should enter, from which he will not be promoted till his progress justifies advancement. To prevent exclusive devotion to one pursuit, it has been found necessary for culpable failure in one branch to refuse promotion in all the rest. Notwithstanding, on account of age, or other peculiar circumstances, exemption from certain studies is sometimes conceded, in which case the scholar is placed "out of course," and is not reckoned as a candidate for honors, or for graduation.

The first half-hour of each day is occupied in attendance at Mass One hour a day is devoted to Arithmetic or Mathematics; two hours a week to the study of modern languages; and the rest of the time, with the exception of lectures on religious or other topics, is spent in the principal class of Latin, Greek, or English.

For each exercise the scholar receives a number of marks according to its quality. At the end of the month public proclamation is made of the sum; tickets of honor are awarded to those excelling, and bulletins containing the number of marks forwarded to parents. The bulletin contains also, marks indicating excellence or deficiency in conduct and punctuality.

At the end of each session examinations are held of all the studies of the session, and marks once more given, and from these two elements — the marks for daily lessons and the marks for examinations — the honors at the annual commencement are determined.

The moral and religious part of education is considered to be incomparably the more important. Catholic students, if living in the vicinity, will be required to be present at Mass every day, to recite the daily catechetical lesson, to attend the weekly lecture on the doctrines of the Church and the annual retreat, to present themselves to the confessor every month, and if they have not received the sacraments of Penance, Confirmation, or Holy Eucharist, to prepare for their reception.

The candidate for admission should be acquainted with and prepared to observe the following rules: —

On arriving, the students will repair immediately to the cloak-room, where they will deposit their books, overcoats, etc.; thence directly to the gymnasium, where they will remain till time for Mass.

Those who are exempted from Mass, if they arrive during Mass, will remain in the gymnasium.

No class is to leave the gymnasium for the school-room, unless accompanied by the teacher.

When any one obtains permission to leave the class-room, he is to return without unnecessary delay.

The places for recreation are the gymnasium and the court. All the rest of the premises are "out of bounds"; except when the Prefect gives permission to walk by the Church, or to members of the Debating Society to recreate in their own room.

The use of tobacco is prohibited.

Playing ball, snow-balling, pitching, and all games that endanger the windows are prohibited.

Whoever damages the College property must make compensation.

No boisterous conduct is allowed in the corridors or class-rooms at any time. Even in the gymnasium and during recreation, the behavior should be decorous.

In fine, any conduct unbecoming the character of a gentleman will be regarded as a violation of the College rules.

Religious motives being habitually appealed to, little need has been experienced of frequent or severe punishment.

Flagrant offences, such as are detrimental to the reputation of the College, or are obstructive of the good of other pupils, are grounds for expulsion.

For faults of ordinary occurrence, — such as tardy arrival, failure in recitations, or minor instances of misconduct, — detention after school, or some lines to be copied or to be committed to memory, are usually found sufficient penalty.

The efforts of teachers and prefects will be much facilitated if the co operation of parents can be secured.

Parents are therefore earnestly requested to insist upon study at home; to notify the teacher speedily in case of the detention or the withdrawal of their children, or of failure to receive the monthly bulletin; to attend to notifications always sent by the teacher the second day of an unexplained absence, or for lessons signally bad during a considerable length of time, and not to pass over without inquiry marks falling below seventy-five.

A place having been provided for the safe-keeping of books and clothing, the College will not be responsible for a loss which could only occur through negligence.

During the past year contributions to the Library have been received from the estate of Rev. M. Dougherty, deceased, from Rev. M. F. Flatley, Rev. Jno. Conlon, Hon. Leopold Morse, R. H. Dana, Sr., Esq., Wm. Kelly, Esq., Mrs. Geo. W. Lloyd, Miss E. F. Cary; mineralogical specimens from Very Rev. Canon Woods, D. H Tully, Esq., J. P. Costin, Esq.; various curiosities from Miss Coolidge; scientific apparatus from Boyd Allen, Esq.

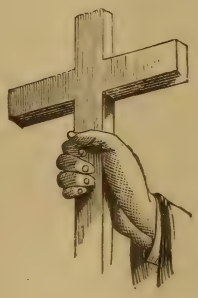
PROSPECTUS

OF

BOSTON COLLEGE.



BOSTON:

ALFRED MUDGE & SON, PRINTERS, 34 SCHOOL STREET.

1878.

A. M. D. G.

BOSTON COLLEGE,

BOSTON, MASS.

This Institution, under the care of Fathers of the Society of Jesus, was incorporated May 25, 1863, by the State of Massachusetts, with power "to confer such degrees as are usually conferred by colleges in this Commonwealth, except medical degrees." Schools were opened Sept. 5, 1864.

It is intended for day scholars only.

The Act of Incorporation provides that "no student of said College shall be refused admission to, or denied any of the privileges, honors, or degrees of said College on account of the religious opinions he may entertain." Students who are not Catholics will not be required to participate in any distinctively Catholic exercise, nor will any undue influence be exerted to induce a change of religious belief. But though no difference of creed will be a bar to admission, evidence will be demanded of the candidate to prove the possession of a good moral character.

To the former classical course, next September, at the earnest solicitation of the Most Reverend Archbishop, will be added a department in which the study of the ancient languages will be superseded by exclusive application to English, the modern languages, and the sciences.

For entrance into the classical department, a knowledge of the fundamental principles of Grammar and Arithmetic will suffice;

for entrance into the English department, a complete knowledge of those two branches will be exacted.

The terms are thirty dollars per session of five months; besides the fee of ten dollars for the diploma, there will be no further expense for tuition.

The first session begins on the first Monday of September; the second, on the first Monday of February; but students are not precluded from entering at other times.

The following are the ordinary holidays: —

Every Saturday.

The days of a session remaining after the close of an examination.

All the holy-days of obligation.

From the 23d of December to the 2d of January.

From Wednesday in Holy Week to Wednesday in Easter Week.

The feasts of St. Patrick and St. Aloysius.

Fast Day, Thanksgiving Day.

Except that attendance will be required for a short time on the first and second Saturdays of the month, not for class recitations, but for certain religious or literary exercises.

The hours of school are from 8½ A. M. to 2 P. M., with recesses at convenient intervals. Distance of residence will be considered sufficient excuse for a later arrival, and during the progress of the examinations the time for closing will be somewhat anticipated.

On admission, the pupil is examined, to determine what classes he should enter, from which he will not be promoted till his progress justifies advancement. To prevent exclusive devotion to one pursuit, it has been found necessary for culpable failure in one branch to refuse promotion in all the rest. Notwithstanding, on account of age, or other peculiar circumstances, exemption from certain studies is sometimes conceded, in which case the scholar is placed "out of course," and is not reckoned as a candidate for honors, or for graduation.

The first half-hour of each day is occupied in attendance at Mass. One hour a day is devoted to Arithmetic or Mathematics; two hours a week to the study of modern languages; and the rest of the time, with the exception of lectures on religious or other topics, is spent in the principal class of Latin, Greek, or English.

For each exercise the scholar receives a number of marks according to its quality. At the end of the month public proclamation is made of the sum; tickets of honor are awarded to those excelling, and bulletins containing the number of marks forwarded to parents. The bulletin contains, also, marks indicating excellence or deficiency in conduct and punctuality.

At the end of each session examinations are held of all the studies of the session, and marks once more given, and from these two elements — the marks for daily lessons and the marks for examinations — the honors at the annual commencement are determined.

The moral and religious part of education is considered to be incomparably the more important. Catholic students, if living in the vicinity, will be required to be present at Mass every day, to recite the daily catechetical lesson, to attend the weekly lecture on the doctrines of the Church and the annual retreat, to present themselves to the confessor every month, and if they have not received the sacraments of Penance, Confirmation, or Holy Eucharist, to prepare for their reception.

The candidate for admission should be acquainted with and prepared to observe the following rules: —

On arriving, the students will repair immediately to the cloak-room, where they will deposit their books, overcoats, etc.; thence directly to the gymnasium, where they will remain till time for Mass.

Those who are exempted from Mass, if they arrive during Mass, will remain in the gymnasium.

No class is to leave the gymnasium for the school-room, unless accompanied by the teacher.

When any one obtains permission to leave the class-room, he is to return without unnecessary delay.

The places for recreation are the gymnasium and the court. All the rest of the premises are "out of bounds"; except when the Prefect gives permission to walk by the Church, or to members of the Debating Society to recreate in their own room.

The use of tobacco is prohibited.

Playing ball, snow-balling, pitching, and all games that endanger the windows are prohibited.

Whoever damages the College property must make compensation·

No boisterous conduct is allowed in the corridors or class-rooms at any time. Even in the gymnasium and during recreation, the behavior should be decorous.

In fine, any conduct unbecoming the character of a gentleman will be regarded as a violation of the College rules.

Religious motives being habitually appealed to, little need has been experienced of frequent or severe punishment.

Flagrant offences, such as are detrimental to the reputation of the College, or are obstructive of the good of other pupils, are grounds for expulsion.

For faults of ordinary occurrence, — such as tardy arrival, failure in recitations, or minor instances of misconduct, — detention after school, or some lines to be copied or to be committed to memory, are usually found sufficient penalty.

The efforts of teachers and prefects will be much facilitated if the co-operation of parents can be secured.

Parents are therefore earnestly requested to insist upon study at home; to notify the teacher speedily in case of the detention or the withdrawal of their children, or of failure to receive the monthly bulletin; to attend to notifications always sent by the teacher the second day of an unexplained absence, or for lessons signally bad during a considerable length of time, and not to pass over without inquiry marks falling below seventy-five.

A place having been provided for the safe-keeping of books and clothing, the College will not be responsible for a loss which could only occur through negligence.

During the past year contributions to the Library have been received from the estate of Rev. M Dougherty, deceased, from Rev. M. F. Flatley, Rev. Jno. Conlon, Hon. Leopold Morse, R. H. Dana, Sr., Esq., Wm. Keily, Esq., Mrs. Geo. W. Lloyd, Miss E. F. Cary; mineralogical specimens from Very Rev. Canon Woods, D. H Tully, Esq., J. P. Costin, Esq.; various curiosities from Miss Coolidge; scientific apparatus from Boyd Allen, Esq.

BOSTON COLLEGE,

BOSTON, MASS.

This Institution, under the care of Fathers of the Society of Jesus, was incorporated May 25, 1863, by the State of Massachusetts, with power "to confer such degrees as are usually conferred by colleges in this Commonwealth, except medical degrees." Schools were opened Sept. 5, 1864.

It is intended for day-scholars only.

The Act of Incorporation provides that "no student of said College shall be refused admission to, or denied any of the privileges, honors, or degrees of said College on account of the religious opinions he may entertain." Students who are not Catholics will not be required to participate in any distinctively Catholic exercise, nor will any undue influence be exerted to induce a change of religious belief. But though no difference of creed will be a bar to admission, evidence will be demanded of the candidate to prove the possession of a good moral character.

To the original classical course was added, September, 1879, at the earnest solicitation of the Most Reverend Archbishop, a department in which the study of the ancient languages is superseded by exclusive application to English, the modern languages, and the sciences.

For entrance into the classical department, a knowledge of the fundamental principles of Grammar and Arithmetic will suffice; for entrance into the English department, a complete knowledge of those two branches will be exacted.

The terms are thirty dollars per session of five months, payable in advance; besides the fee of ten dollars for the diploma, there will be no further expense for tuition.

The first session begins on the first Monday of September; the second, on the first Monday of February; but students are not precluded from entering at other times.

The following are the ordinary holidays: —

Every Saturday.

The days of a session remaining after the close of an examination.

All the holy days of obligation.

From the 23d of December to the 2d of January.

From Wednesday in Holy Week to Wednesday in Easter Week.

The feasts of St. Patrick and St. Aloysius.

Fast Day, Thanksgiving Day.

Except that attendance will be required for a short time on the first and second Saturdays of the month, not for class recitations, but for certain religious or literary exercises.

The hours of school are from 8½ A.M. to 2 P.M., with recesses at convenient intervals. Distance of residence will be considered sufficient excuse for a later arrival, and during the progress of the examinations the time for closing will be somewhat anticipated.

On admission, the pupil is examined, to determine what classes he should enter, from which he will not be promoted till his progress justifies advancement. To prevent exclusive devotion to one pursuit, it has been found necessary for culpable failure in one branch to refuse promotion in all the rest. Notwithstanding, on account of age, or other peculiar circumstances, exemption from certain studies is sometimes conceded, in which case the scholar is placed "out of course," and is not reckoned as a candidate for honors or for graduation.

The first half-hour of each day is occupied in attendance at Mass. One hour a day is devoted to Arithmetic or Mathematics; two hours a week to the study of modern languages; and the rest of the time, with the exception of lectures on religious or other topics, is spent in the principal class of Latin, Greek, or English.

For each exercise the scholar receives a number of marks, according to its quality. At the end of the month public proclamation is made of the sum; tickets of honor are awarded to those excelling, and bulletins containing the number of marks forwarded to parents. The bulletin contains, also, marks indicating excellence or deficiency in conduct and punctuality.

At the end of each session examinations are held of all the

studies of the session, and marks once more given, and from these two elements — the marks for daily lessons and the marks for examinations — the honors at the annual commencement are determined.

The moral and religious part of education is considered to be incomparably the most important. Catholic students, if living in the vicinity, will be required to be present at Mass every day, to recite the daily catechetical lesson, to attend the weekly lecture on the doctrines of the Church and the annual retreat, to present themselves to their confessor every month, and if they have not received the sacraments of Penance, Confirmation, or Holy Eucharist, to prepare for their reception.

The candidate for admission should be acquainted with, and prepared to observe, the following rules: —

On arriving, the students will repair immediately to the cloak-room, where they will deposit their books, overcoats, etc.; thence proceed directly to the gymnasium, where they will remain till time for Mass.

Those who are exempted from Mass, if they arrive during Mass, will remain in the gymnasium.

No class is to leave the gymnasium for the school-room, unless accompanied by the teacher.

When any one obtains permission to leave the class-room, he is to return without unnecessary delay.

The places for recreation are the gymnasium and the court. All the rest of the premises are "out of bounds;" except when the Prefect gives permission to walk by the Church, or to members of the Debating Society to recreate in their own room.

The use of tobacco is prohibited.

Playing ball, snow-balling, pitching, and all games that endanger the windows are prohibited.

Whoever damages the College property must make compensation.

No boisterous conduct is allowed in the corridors or class-rooms at any time. Even in the gymnasium, and during recreation, the behavior should be decorous.

In fine, any conduct unbecoming the character of a gentleman will be regarded as a violation of the College rules.

Religious motives being habitually appealed to, little need has been experienced of frequent or severe punishment.

Flagrant offences, such as are detrimental to the reputation of the

College, or are obstructive of the good of other pupils, are grounds for expulsion.

For faults of ordinary occurrence,— such as tardy arrival, failure in recitations, or minor instances of misconduct,— detention after school, or some lines to be copied or to be committed to memory, are usually found sufficient penalty.

The efforts of teachers and prefects will be much facilitated if the co-operation of parents can be secured.

Parents are therefore earnestly requested to insist upon study at home; to notify the teacher speedily in case of the detention or the withdrawal of their children, or of failure to receive the monthly bulletin; to attend to notifications always sent by the teacher the second day of an unexplained absence, or for lessons signally bad during a considerable length of time, and not to pass over without inquiry marks falling below seventy-five.

A place having been provided for the safe-keeping of books and clothing, the College will not be responsible for a loss which could only occur through negligence.

Grateful acknowledgment is made of books, mineralogical specimens, and other gifts, received during the year, from Hugh Carey, Esq., Robert Morris, Esq., Mrs. Charles Astor Bristed, Edward Ryan, Esq., P. Howard, Esq., Rev. M. Dolan, Edward Rankin, Esq , F. B. Morse, Esq., Hon. Leopold Morse, Rev. M. Flatley.

I.

Veritas logica, quæ in conformitate mentis cum re est posita, alia ratione ideis, alia judiciis convenit. Est in ideis quasi materialiter, ut in re vera: in judiciis autem formaliter, ut objectum cognitum et affirmatum. (S. Thomas 1ª . p. q. XVI. art 2.)

II.

Quoad certitudinem tria asserimus: 1°. eam existere, proindeque rejicienda Scepticorum universalium commenta; 2°. spectato elemento positivo eam majorem vel minorem esse posse; 3°. adeo falsum esse ad eam nonnisi demonstrationis ope perveniri, ut, hoc admisso, demonstratio omnis impossibilis evadat.

III.

Sensibilium repræsentationum causa nequit esse (*a*) subjectum cogitans, ut Idealistæ subjectivi contendunt; nec (*b*) Deus, corporibus non existentibus, ut Idealistæ objectivi opinantur; sed (*c*) sunt corpora realiter extra nos existentia. Ut autem judicia, quæ sensuum relationibus innituntur, vera sint, requiritur (*d*) ut sensus sint recte dispositi et convenienter adhibiti.

IV.

Intellectus humanus verax est tum quatenus judicia immediata profert, sive ea ad rationalem sive ad experimentalem ordinem pertinent — tum quatenus ratiocinio utitur, ignotum ex noto deducendo — dummodo ratiocinium ipsum præmissis constet veris et ad legitimam formam sit exactum.

V.

Explanata testis ratione statuimus 1°. testimonium dogmaticum humanum raro iis adjunctis circumvestiri, quibus probabilitatis fines excedat; 2°. testimonium vero historicum si, uti sæpe contingit, legitimum est, tale esse ex quo cognitiones certas hauriamus.

VI.

Universale veritatis criterium, seu norma secundum quam verum a falso certo dignoscimus, constitui nequit (*a*) in humana vel divina auctoritate, ut De Lamennais et Huet asseruerunt; neque (*b*) in cæco naturæ instinctu, ut tenent quidam ex schola Scotica; sed (*c*) reponendum est in objectiva evidentia, seu necessaria veritatis intelligibilitate.

VII.

Causæ efficientis claram ideam habemus, quæ non consistit in mera entium successione, sed in positivo influxu unius in alterius productionem. Hunc influxum exerceri tum a spiritibus, tum a corporibus contra Occasionalistas defendimus.

VIII.

Origo mundi explicari nequit per existentiam materiæ improductæ; neque per emanationem ex divina substantia, sub quacunque forma a Pantheistis adstruatur; sed per productionem rerum ex nihilo, quod intelligimus nomine *creationis*.

IX.

Habita ratione tum ordinis in rebus existentis, tum divinorum attributorum, *miracula*, seu "eventus totius naturæ creatæ facultatem ordinemque consuetum excedentes" nullam involvere repugnantiam dicenda sunt. Dignosci præterea possunt tum ab operibus naturæ, tum a præstigiis dæmonum.

X.

Anima humana est substantia simplex et spiritualis. Materiæ autem adeo repugnat cogitatio, ut materia cogitans ne a Deo quidem effici posset.

XI.

Quum nihil sit quod animæ humanæ annihilationem a Deo exigat; immo multa dentur quæ ejusdem perpetuam conservationem requirant, anima immortalis dicenda est.

XII.

Anima rationalis sic corpori unitur ut ejusdem sit vera forma substantialis. Quapropter non modo rejicienda sunt systemata causarum occasionalium, harmoniæ præstabilitæ et influxus physici, verum etiam illorum opinio qui animam corpori nonnisi vitam dari autumant.

XIII.

Voluntas humana gaudet arbitrii libertate. Libertas autem non modo indifferentiam objectivam et passivam requirit, sed etiam et præcipue *indifferentiam activam*, qua fit ut, positis omnibus requisitis ad agendum, voluntas possit agere vel non agere, aut ita eligere unum ut aliud possit eligere.

XIV.

Distinctione facta inter universale *Directum* et *Reflexum*, contend mus primum efformari per abstractionem elementi intelligibilis ab elemento sensibili; alterum per idearum comparationem. Universale autem reflexum proprie dicitur universale.

XV.

Dei existentia argumentis metaphysicis, physicis et moralibus invicte probatur. Metaphysica argumenta suppeditat contingentia rerum; physica, ordo qui reapse viget in mundo; moralia autem, perpetuus et universalis humani generis consensus.

XVI.

Conceptus *entis a se* qui, juxta nostrum concipiendi modum, haberi solet ut ratio naturæ divinæ constitutiva, plane differt ab idea *entis in genere.* Porro ex eo quod Deus sit ens a se colligimus Ipsius perfectionem nullo limite constringi.

XVII.

Deus de omnibus rebus providentiam habet. Huic bonorum ac malorum, quæ habetur in mundo, distributio minime adversatur.

XVIII.

Deus est ultimus hominis finis seu objectum in quo homo suam felicitatem reperire potest.

XIX.

Moralitas actionum humanarum, seu distinctio inter bonum et malum morale, quam ubique terrarum et semper homines agnoverunt, non pendet ab arbitrario hominum consensu, ut Hobbes contendit; neque a motu affectuque animi, ut Smith asserit; neque ab utilitate privata vel publica, ut docet Bentham, sed ab ordine objectivo rerum. Quare intrinsecum datur discrimen inter bonum et malum morale.

XX.

Existit lex naturalis quæ ordinem moralem servari jubet, perturbari vetat. Hæc porro absoluta gaudet immutabilitate, et quoad generaliora principia a nemine, qui rationis sit compos, ignoratur.

XXI.

Homo lege naturæ tenetur Deum colere cultu interno et externo.

XXII.

Suicidium, homicidium et duellum jure naturæ prohibentur. Licet tamen injustum vitæ aggressorem occidere, quum occisio hic et nunc est medium unicum vitæ tuendæ et mors ipsa directe non intenditur.

XXIII.

Jus proprietatis stabilis provenit ab ipsa natura et privatorum bonorum distributio, quam communismus inducere vellet, quum injusta est, tum etiam absque summo humanæ societatis detrimento in praxim deduci nequit.

XXIV.

Quum societas civilis naturalis homini sit atque ea sine auctoritate esse non possit, *socialis auctoritas* a Deo provenire dicenda est. A veritate ergo aberrant tum Hobbes, qui contendit statum hominis naturalem esse statum belli omnium contra omnes atque societatem ideo fuisse initam ut mala ex illo bello provenientia, averterentur; tum theoria contractus socialis, quam J. J. Rousseau proposuit atque defendit.

BOSTON COLLEGE,

BOSTON, MASS.

This Institution, under the care of Fathers of the Society of Jesus, was incorporated May 25, 1863, by the State of Massachusetts, with power "to confer such degrees as are usually conferred by colleges in this Commonwealth, except medical degrees." Schools were opened September 5, 1864.

It is intended for day-scholars only.

The Act of Incorporation provides that "no student of said College shall be refused admission to, or denied any of the privileges, honors, or degrees of said College on account of the religious opinions he may entertain." Students who are not Catholics will not be required to participate in any distinctively Catholic exercise, nor will any undue influence be exerted to induce a change of religious belief. But though no difference of creed will be a bar to admission, evidence will be demanded of the candidate to prove the possession of a good moral character.

To the original classical course was added, September, 1879, at the special instance of the Most Reverend Archbishop, a department in which the study of the ancient languages is superseded by exclusive application to English, the modern languages and the sciences. This course is intended to offer the advantages of a thorough English and business education to that large class of our youth who, not intending to follow the professions, stand in no immediate need of classical training; but for whom it is of such vast importance that they be well grounded in their faith and spend a few years at least under healthy religious influence.

For entrance into the classical department, a knowledge of the

fundamental principles of Grammar and Arithmetic will suffice; for entrance into the English department, a complete knowledge of those two branches will be exacted.

The terms are thirty dollars per session of five months, payable in advance; besides the fee of ten dollars for the diploma, there will be no further charges made by the college.

The first session begins on the first Monday of September; the second, on the first Monday of February; but students are not precluded from entering at other times.

The following are the ordinary holidays:—

Every Saturday.

The days of a session remaining after the close of an examination.

All the holy days of obligation.

From the 23d of December to the 2d of January.

From Wednesday in Holy Week to Wednesday in Easter Week.

The feasts of St. Patrick and St. Aloysius.

Fast Day, Thanksgiving Day, Decoration Day.

Attendance will be required for a short time on the first and second Saturdays of the month, not for class recitations, but for certain religious or literary exercises.

The hours of school are from 8½ A.M. to 2 P.M., with recesses at convenient intervals. Distance of residence will be considered sufficient excuse for a later arrival. During the progress of the examinations, the time for closing will be somewhat anticipated.

On admission, the pupil is examined, to determine what classes he should enter, from which he will not be promoted till his progress justifies advancement. To prevent exclusive devotion to one pursuit, it has been found necessary, for culpable failure in one branch, to refuse promotion in all the rest. Notwithstanding, on account of age, or other peculiar circumstances, exemption from certain studies is sometimes conceded; in which case the scholar is placed "out of course," and is not reckoned as a candidate for honors or for graduation.

The first half-hour of each day is occupied in attendance at Mass. One hour a day is devoted to Arithmetic or Mathematics; two hours a week to the study of modern languages; and the rest of the time, with the exception of that devoted to lectures on religious or other topics, is spent in the principal class of Latin, Greek, or English.

For each memory lesson, according to its excellence, the scholar receives a mark grading from 10 down; if the recitation be a translation the mark is twice counted, and for Themes or Compositions it is counted three times; as the labor of preparation of these various exercises, and their relative importance, are considered to be to each other as one, two and three. At the end of each month, public proclamation is made of the average of all marks, in the separate departments of Classics, Mathematics, and modern languages. The average of these monthly averages is what is termed the average of monthly results; at the middle examination averages are given in like manner for the various branches, and a common examination average struck. To obtain the term average, that of the monthly results and of the examination are added, and their sum divided by two. In the second term or session the same method is followed, and the year's results are seen in the average resulting from the combination of those of the two terms. According to this average of results for the year, commencement honors, grade and promotions are determined.

The moral and religious part of education is considered to be incomparably the most important. Catholic students, if not excused for good reasons, will be required to be present at Mass every day, to recite the daily catechetical lesson, to attend the weekly lecture on the doctrines of the Church, to make the annual retreat, to present themselves to their confessor every month, and, if they have not received the sacraments of Penance, Confirmation or Holy Eucharist, to prepare for their reception.

The candidate for admission should be acquainted with and prepared to observe the following rules: —

On arriving at the college, the students will repair immediately to the cloak-room, where they will deposit their books, overcoats, etc.; thence they will proceed directly to the gymnasium, where they will remain till time for Mass.

Those who are not required to be present at Mass, if they arrive during Mass, will remain in the gymnasium.

No class is to leave the gymnasium for the school-room, unless accompanied by the teacher.

When any one obtains permission to leave the class-room, he is to return without unnecessary delay.

The places for recreation are the gymnasium and the court. All the rest of the premises are "out of bounds"; except when the

Prefect gives permission to walk by the Church, or, to members of the Debating Society, to recreate in their own room.

The use of tobacco is prohibited.

Playing ball, snowballing, pitching, and all games that endanger the windows are prohibited.

Whoever damages the College property must make compensation.

No boisterous conduct is allowed in the corridors or class-rooms at any time. Even in the gymnasium, and during recreation, the behavior should be decorous.

In fine, any conduct unbecoming the character of a gentleman will be regarded as a violation of the College rules.

Religious motives being habitually appealed to, little need has been experienced of frequent or severe punishment.

Flagrant offences, such as are detrimental to the reputation of the College, or are obstructive of the good of other pupils, are grounds for expulsion.

For faults of ordinary occurrrence,—such as tardy arrival, failure in recitations, or minor instances of misconduct,— detention after school, or the task of copying or committing to memory some lines of an author, is usually found sufficient penalty.

The efforts of teachers and prefects will be much facilitated, if the co-operation of parents can be secured.

Parents are therefore earnestly requested to insist upon daily study at home; to notify the Prefect speedily in case of the detention or the withdrawal of their sons, or of failure to receive the monthly bulletin; to attend to notifications, always sent by the Prefect the second day of an unexplained absence, or for lessons signally bad during a considerable length of time; and not to pass over without inquiry averages falling below seventy-five.

A place having been provided for the safe keeping of books and clothing, the College will not be responsible for a loss which could occur only through negligence.

Grateful acknowledgment is made of books, mineralogical specimens, and other gifts, received during the year, from Smithsonian Institute, Department of the Interior, Hon. Leopold Morse, Charles Rollin Brainard, Esq., Rev. Edw. H. Welch, S.J., Wm. H. O'Connell.

BOSTON COLLEGE,

BOSTON, MASS.

This Institution, under the care of Fathers of the Society of Jesus, was incorporated May 25, 1863, by the State of Massachusetts, with power "to confer such degrees as are usually conferred by colleges in this Commonwealth, except medical degrees." Schools were opened September 5, 1864.

It is intended for day scholars only.

The Act of Incorporation provides that "no student of said College shall be refused admission to, or denied any of the privileges, honors, or degrees of said College on account of the religious opinions he may entertain." Students who are not Catholics will not be required to participate in any distinctively Catholic exercise, nor will any undue influence be exerted to induce a change of religious belief. But though no difference of creed will be a bar to admission, evidence will be demanded of the candidate to prove the possession of a good moral character.

To the original classical course was added, September, 1879, at the special instance of the Most Reverend Archbishop, a department in which the study of the ancient languages is superseded by exclusive application to English, the modern languages and the sciences. This course is intended to offer the advantages of a thorough English and business education to that large class of our youth, who, not intending to follow the professions, stand in no immediate need of classical training; but for whom it is of such vast importance that they be well grounded in their faith, and spend a few years at least under healthy religious influence.

For entrance into the classical department, a knowledge of the

fundamental principles of Grammar and Arithmetic will suffice; for entrance into the English department, a complete knowledge of those two branches will be exacted.

The terms are thirty dollars per session of five months, payable in advance; besides the fee of ten dollars for the diploma, there will be no further charges made by the College.

The first session begins on the first Monday of September; the second, on the first Monday of February; but students are not precluded from entering at other times.

The following are the ordinary holidays: —

Every Saturday.

The days of a session remaining after the close of an examination.

All the holy days of obligation.

From the 23d of December to the 2d of January.

From Wednesday in Holy Week to Wednesday in Easter Week.

The feasts of St. Patrick and St. Aloysius.

Fast Day, Thanksgiving Day, Decoration Day.

Attendance will be required for a short time on the first and second Saturdays of the month, not for class recitations, but for certain religious or literary exercises.

The hours of school are from 8½ A.M. to 2 P.M., with recesses at convenient intervals. Distance of residence will be considered sufficient excuse for a later arrival. During the progress of the examinations, the time for closing will be somewhat anticipated.

On admission, the pupil is examined, to determine what classes he should enter, from which he will not be promoted till his progress justifies advancement. To prevent exclusive devotion to one pursuit, it has been found necessary, for culpable failure in one branch, to refuse promotion in all the rest. Notwithstanding, on account of age, or other peculiar circumstances, exemption from certain studies is sometimes conceded; in which case the scholar is placed "out of course," and is not reckoned as a candidate for honors or for graduation.

The first half-hour of each day is occupied in attendance at Mass. One hour a day is devoted to Arithmetic or Mathematics; two hours a week to the study of modern languages; and the rest of the time, with the exception of that devoted to lectures on religious or other topics, is spent in the principal class of Latin, Greek, or English.

For each memory lesson, according to its excellence, the scholar receives a mark grading from 10 down; if the recitation be a translation the mark is twice counted, and for Themes or Compositions it is counted three times; as the labor of preparation of these various exercises, and their relative importance, are considered to be to each other as one, two, and three. At the end of each month, public proclamation is made of the average of all marks, in the separate departments of Classics, Mathematics, and Modern Languages. The average of these monthly averages is what is termed the average of monthly results; at the middle examination averages are given in like manner for the various branches, and a common examination average struck. To obtain the term average, that of the monthly results and of the examination are added, and their sum divided by two. In the second term or session the same method is followed, and the year's results are seen in the average resulting from the combination of those of the two terms. According to this average of results for the year, commencement honors, grade, and promotions are determined.

The moral and religious part of education is considered to be incomparably the most important. Catholic students, if not excused for good reasons, will be required to be present at Mass every day, to recite the daily catechetical lesson, to attend the weekly lecture on the doctrines of the Church, to make the annual retreat, to present themselves to their confessor every month, and, if they have not received the Sacraments of Penance, Confirmation, or Holy Eucharist, to prepare for their reception.

The candidate for admission should be acquainted with and prepared to observe the following rules: —

On arriving at the college, the students will repair immediately to the cloak-room, where they will deposit their books, overcoats, etc.; thence they will proceed directly to the gymnasium, where they will remain till time for Mass.

Those who are not required to be present at Mass, if they arrive during Mass, will remain in the gymnasium.

No class is to leave the gymnasium for the school-room, unless accompanied by the teacher.

When any one obtains permission to leave the class-room, he is to return without unnecessary delay.

The places for recreation are the gymnasium and the court. All the rest of the premises are "out of bounds"; except when the

Prefect gives permission to walk by the Church, or, to members of the Debating Society, to recreate in their own room.

The use of tobacco is prohibited.

Playing ball, snowballing, pitching, and all games that endanger the windows are prohibited.

Whoever damages the College property must make compensation.

No boisterous conduct is allowed in the corridors or class-rooms at any time. Even in the gymnasium, and during recreation, the behavior should be decorous.

In fine, any conduct unbecoming the character of a gentleman will be regarded as a violation of the College rules.

Religious motives being habitually appealed to, little need has been experienced of frequent or severe punishment.

Flagrant offences, such as are detrimental to the reputation of the College, or are obstructive of the good of other pupils, are grounds for expulsion.

For faults of ordinary occurrence,— such as tardy arrival, failure in recitations, or minor instances of misconduct,— detention after school, or the task of copying or committing to memory some lines of an author, is usually found sufficient penalty.

The efforts of teachers and prefects will be much facilitated, if the co-operation of parents can be secured.

Parents are, therefore, earnestly requested to insist upon daily study at home; to notify the Prefect speedily in case of the detention or the withdrawal of their sons, or of failure to receive the monthly bulletin; to attend to notifications, always sent by the Prefect the second day of an unexplained absence, or for lessons signally bad during a considerable length of time; and not to pass over without inquiry averages falling below seventy-five.

A place having been provided for the safe keeping of books and clothing, the College will not be responsible for a loss which could occur only through negligence.

Grateful acknowledgment is made of books, mineralogical specimens, and other gifts, received during the year, from Smithsonian Institute, Department of the Interior, Hon. Leopold Morse, Charles Rollin Brainard, Esq., Dr. John Dean, M. J. Ward, Esq., and others.

BOSTON COLLEGE,

BOSTON, MASS.

This Institution, under the care of Fathers of the Society of Jesus, was incorporated May 25, 1863, by the State of Massachusetts, with power "to confer such degrees as are usually conferred by colleges in this Commonwealth, except medical degrees." Schools were opened September 5, 1864.

It is intended for day scholars only.

The act of Incorporation provides that "no student of said College shall be refused admission to, or denied any of the privileges, honors or degrees of said College on account of the religious opinions he may entertain." Students who are not Catholics, will not be required to participate in any distinctively Catholic exercise, nor will any undue influence be exerted to induce a change of religious belief. But, though no difference of creed will be a bar to admission, evidence will be demanded of the candidate to prove the possession of a good moral character.

To the original classical course was added, September, 1879, at the special instance of the Most Reverend Archbishop, a department in which the study of the ancient languages is superseded by exclusive application to English, the modern languages and the sciences. This course is intended to offer the advantages of a thorough English and business education to that large class of our youth, who, not intending to follow the professions, stand in no immediate need of classical training; but for whom it is of

such vast importance that they be well grounded in their faith, and spend a few years, at least, under healthy religious influence. Although this course has been open for four years, and nothing has been spared that could be availed of to make it successful, comparatively few have patronized it; and, so far, the foundation has not been laid for the regular succession of graded classes, as in the longer, classical course. It is hoped that the friends of the College will call the attention of the large number of the community, who have sons intended for business, to the fact, that a first-class business, literary, and Christian, Catholic education may be had in the English and commercial course at Boston College. Parents, who have the opportunity of doing otherwise, cannot afford to take the responsibility of eliminating the religious part of the education of their sons.

For entrance into the classical department, a knowledge of the fundamental principles of Grammar and Arithmetic will suffice; for entrance into the English department, a complete knowledge of those two branches will be exacted.

The terms are thirty dollars per session of five months, payable in advance; besides the fee of ten dollars for the diploma, and five dollars, during the Philosophy year, for laboratory expenses, there will be no further charges made by the College.

N. B. All bills must be settled before graduation.

The first session begins on the first Monday of September; the second, on the first Monday of February; but students are not precluded from entering at other times.

The following are the ordinary holidays: —

Every Saturday;

The days of a session remaining after the close of an examination;

All the holy days of obligation;

From the 23rd of December to the 2nd of January;

From Wednesday in Holy Week to Wednesday in Easter Week;

The feasts of St. Patrick and St. Aloysius;

Fast Day, Thanksgiving Day, Decoration Day;

Attendance will be required, for a short time, on the first and second Saturdays of the month; not for class recitations, but for certain religious or literary exercises. For absence on these days, only grave reasons will be received as excuse.

The hours of class are, from 8½ A.M. to 2 P.M., with recesses at convenient intervals. Special arrangement with the Prefect,

will be necessary, in each individual case, to excuse later arrival. During the progress of the examinations, the time for closing will be somewhat anticipated.

On admission, the pupil is examined, to determine what classes he should enter, from which he will not be promoted till his progress justifies advancement. To prevent exclusive devotion to one pursuit, it has been found necessary, for culpable failure in one branch, to refuse promotion in all the rest. Notwithstanding, on account of age, or other peculiar circumstances, exemption from certain studies is sometimes conceded; in which case, the scholar is placed "out of course," and is not reckoned as a candidate for honors or for graduation.

The first half-hour of each day is occupied in attendance at Mass. It is scarcely necessary to impress on Catholic parents the importance of this salutary practice. One hour a day is devoted to Arithmetic or Mathematics; two hours a week, to the study of modern languages; and the rest of the time, with the exception of that devoted to lectures on religious or other topics, is spent in the principal class of Latin, Greek, or English.

For each memory lesson, according to its excellence, the scholar receives a mark, grading from ten down; if the recitation be a translation, the mark is twice counted, and for Themes or Compositions, it is counted three times; as the labor of preparation of these various exercises, and their relative importance, are considered to be to each other as one, two and three. At the end of each month, public proclamation is made of the average of all marks, in the separate departments of Classics, Mathematics and Modern Languages. The average of these monthly averages is what is termed the average of monthly results; at the middle examination, averages are given in like manner for the various branches, and a common examination average struck. To obtain the term average, that of the monthly results and of the examination are added, and their sum divided by two. In the second term or session the same method is followed, and the year's results are seen, in the average resulting from the combination of those of the two terms. According to this average of results for the year, commencement honors, grade and promotions are determined.

The moral and religious part of education is considered to be incomparably the most important. Catholic students, if not excused for good reasons, will be required to be present at Mass every day, to recite the daily catechetical lesson, to attend the

weekly lecture on the doctrines of the Church, to make the annual retreat, to present themselves to their confessor every month, and, if they have not received the Sacraments of Penance, Confirmation, or Holy Eucharist, to prepare for their reception.

The candidate for admission should be acquainted with, and prepared to observe the following rules: —

On arriving at the College, the students will repair immediately to the cloak-room, where they will deposit their books, overcoats, etc.; thence they will proceed directly to the gymnasium, where they will remain till time for Mass.

Those who are not required to be present at Mass, if they arrive during Mass, will remain in the gymnasium.

No class is to leave the gymnasium for the class-room, unless accompanied by the teacher or professor.

When any one obtains permission to leave the class-room, he is to return without unnecessary delay.

The places for recreation are the gymnasium and the court. All the rest of the premises are "out of bounds"; except when the Prefect gives permission to walk by the Church, or, to members of the Debating Societies, to recreate in their own room.

The use of tobacco is prohibited.

Playing ball, snowballing, pitching, and all games that endanger the windows are prohibited.

Whoever damages the College property must make compensation.

No boisterous conduct is allowed in the corridors or class-rooms at any time. Even in the gymnasium, and during recreation, the behavior should be decorous.

In fine, any conduct unbecoming the character of a gentleman will be regarded as a violation of the College rules.

Religious motives being habitually appealed to, little need has been experienced of frequent or severe punishment.

Flagrant offenses, such as are detrimental to the reputation of the College, or are obstructive of the good of other pupils, are grounds for expulsion.

For faults of ordinary occurrence, such as tardy arrival, failure in recitations, or minor instances of misconduct, detention after school, or the task of copying or committing to memory some lines of an author, is usually found sufficient penalty.

The efforts of teachers and prefects will be much facilitated, if the co-operation of parents can be secured.

Parents are, therefore, earnestly requested to insist upon daily study at home, for two or three hours, at least; to notify the Prefect speedily in case of the detention or withdrawal of their sons, of necessary detention from, or tardy arrival at school; of failure to receive the monthly bulletin: to attend to notifications, always sent by the Prefect the second day of an unexplained absence, or for lessons signally bad during a considerable length of time; and not to pass over without inquiry averages falling below seventy-five. It is respectfully asked that parents be prompt in answering notes sent them by college officers.

Grateful acknowledgment is made of books, mineralogical specimens and other gifts, received during the year, from the Smithsonian Institute, Department of the Interior, Hon. Leopold Morse, Miss Speare, Rev. B. A. Maguire, S. J., Miss Whelan, Mrs. Robt. Morris, Rev. Wm. Orr, J. M. Prendergast, Esq., D. H. Tully, Esq. and Ransom B. Fuller, Esq.

BOSTON COLLEGE,

BOSTON, MASS.

This institution, under the care of Fathers of the Society of Jesus, was incorporated May 25, 1863, by the State of Massachusetts, with power "to confer such degrees as are usually conferred by colleges in this Commonwealth, except medical degrees." Schools were opened September 5, 1864.

It is intended for day scholars only.

The act of Incorporation provides that "no student of said College shall be refused admission to, or denied any of the privileges, honors or degrees of said College on account of the religious opinions he may entertain." Students who are not Catholics, will not be required to participate in any distinctively Catholic exercise, nor will any undue influence be exerted to induce a change of religious belief. But, though no difference of creed will be a bar to admission, evidence will be demanded of the candidate to prove the possession of a good moral character.

To the original classical course was added, September, 1879, at the special instance of the Most Reverend Archbishop, a department in which the study of the ancient languages is superseded by exclusive application to English, the modern languages and the sciences. This course is intended to offer the advantages of a thorough English and business education to that large class of our youth, who, not intending to follow the professions, stand in no immediate need of classical training; but for whom it is of such vast importance that

they be well grounded in their faith, and spend a few years, at least, under healthy religious influence. Although this course has been open for four years, and nothing has been spared that could be availed of to make it successful, comparatively few have patronized it; and, so far, the foundation has not been laid for the regular succession of graded classes, as in the longer, classical course. It is hoped that the friends of the College will call the attention of the large number of the community, who have sons intended for business, to the fact, that a first-class business, literary, and Christian, Catholic education may be had in the English and Commercial course at Boston College. Parents, who have the opportunity of doing otherwise, cannot afford to take the responsibility of eliminating the religious part of the education of their sons.

For entrance into the classical department, a knowledge of the fundamental principles of Grammar and Arithmetic will suffice; for entrance into the English department, a complete knowledge of those two branches will be exacted.

The terms are thirty dollars per session of five months, payable in advance; besides the fee of ten dollars for the diploma, and five dollars, during the Philosophy year, for laboratory expenses, there will be no further charges made by the College.

N. B. All bills must be settled before graduation.

The first session begins on the first Monday of September; the second, on the first Monday of February; but students are not precluded from entering at other times.

The following are the ordinary holidays:—

Every Saturday;

The days of a session remaining after the close of an examination;

All the holy days of obligation;

From the 23d of December to the 2d of January;

From Wednesday in Holy Week to Wednesday in Easter Week;

The Feasts of St Patrick and St. Aloysius;

Fast Day, Decoration Day, Thanksgiving Day.

Attendance will be required, for a short time, on the first and second Saturdays of the month; not for class recitations, but for certain religious or literary exercises. For absence on these days, only grave reasons will be received as excuse.

The hours of class are from 8.30 A.M. to 2 P. M., with recesses at convenient intervals. Special arrangements with the Prefect will be necessary, in each individual case, to excuse later arrival. During the progress of the examinations, the time for closing will be somewhat anticipated.

On admission, the pupil is examined, to determine what classes he should enter, from which he will not be promoted till his progress justifies advancement. To prevent exclusive devotion to one pursuit, it has been found necessary, for culpable failure in one branch, to refuse promotion in all the rest. Notwithstanding, on account of age, or peculiar circumstances, exemption from certain studies is sometimes conceded; in which case, the scholar is placed "out of course," and is not reckoned as a candidate for honors or for graduation.

The first half-hour of each day is occupied in attendance at Mass. It is scarcely necessary to impress on Catholic parents the importance of this salutary practice. One hour a day is devoted to Arithmetic or Mathematics; two hours a week, to the study of modern languages; and the rest of the time, with the exception of that devoted to lectures on religious or other topics, is spent in the principal class of Latin, Greek or English.

For each memory lesson, according to its excellence, the scholar receives a mark, grading from ten down; if the recitation be a translation, the mark is twice counted, and for Themes or Compositions, it is counted three times; as the labor of preparation of these various exercises, and their relative importance, are considered to be to each other as one, two and three. At the end of each month, public proclamation is made of the average of all marks, in the separate departments of Classics, Mathematics and Modern Languages. The average of these monthly averages is what is termed the average of monthly results; at the middle examination, averages are given in like manner for the various branches, and a common examination average struck. To obtain the term average, that of the monthly results and of the examination are added, and their sum divided by two. In the second term or session the same method is followed, and the year's results are seen, in the average resulting from the combination of those of the two terms. According to this

average of results for the year, commencement honors, grade and promotions are determined.

The moral and religious part of education is considered to be incomparably the most important. Catholic students, if not excused for good reasons, will be required to be present at Mass every day, to recite the daily catechetical lesson, to attend the weekly lecture on the doctrines of the Church, to make the annual retreat, to present themselves to their confessor every month, and, if they have not received the Sacraments of Penance, Confirmation, or Holy Eucharist, to prepare for their reception.

The candidate for admission should be acquainted with, and prepared to observe the following rules:—

On arriving at the College, the students will repair immediately to the cloak-room where they will deposit their books, overcoats, etc.; thence they will proceed directly to the gymnasium, where they will remain till time for Mass.

Those who are not required to be present at Mass, if they arrive during Mass, will remain in the gymnasium.

No class is to leave the gymnasium for the class-room, unless accompanied by the teacher or professor.

When any one obtains permission to leave the class-room, he is to return without unnecessary delay.

The places for recreation are the gymnasium and the court. All the rest of the premises are "out of bounds"; except when the Prefect gives permission to walk by the church, or, to members of the Debating Societies, to recreate in their own room.

The use of tobacco is prohibited.

Playing ball, snowballing, pitching, and all games that endanger the windows are prohibited.

Whoever damages the College property must make compensation.

No boisterous conduct is allowed in the corridors or class-rooms at any time. Even in the gymnasium, and during recreation, the behavior should be decorous.

In fine, any conduct unbecoming the character of a gentleman will be regarded as a violation of the College rules.

Religious motives being habitually appealed to, little need has been experienced of frequent or severe punishment.

Flagrant offenses, such as are detrimental to the reputation of the

College, or are obstructive of the good of other pupils, are grounds for expulsion.

For faults of ordinary occurrence, such as tardy arrival, failure in recitations, or minor instances of misconduct, detention after school or the task of copying or committing to memory some lines of an author, is usually found sufficient penalty.

The efforts of teachers and prefects will be much facilitated, if the co-operation of parents can be secured.

Parents are, therefore, earnestly requested to insist upon daily study at home, for two or three hours, at least; to notify the Prefect speedily in case of the detention or withdrawal of their sons, of necessary detention from, or tardy arrival at school; of failure to receive the monthly bulletin; to attend to notifications, always send by the Prefect the second day of an unexplained absence, or for lessons signally bad during a considerable length of time; and not to pass over without inquiry averages falling below seventy-five. It is respectfully asked that parents be prompt in answering notes sent them by college officers.

Grateful acknowledgment is made of books, mineralogical specimens and other gifts, received during the year, from the Department of the Interior, Smithsonian Institute, Hon. P. A. Collins, Hon. Leopold Morse, Mrs. Robt. Morris, Rev. Wm. Orr, D. H. Tully, Esq., Thomas Kelley, Esq., Joseph A. Iasigi, Esq., Rev. M. McDonald, S.J., late of Malden, Misses E. Iasigi, E. O'Brien, M. Cummings.

BOSTON COLLEGE.

A. M. D. G.

PROSPECTUS.

This institution, under the care of Fathers of the Society of Jesus, was incorporated May 25, 1863, by the State of Massachusetts, with power "to confer such degrees as are usually conferred by colleges in this Commonwealth, except medical degrees." Schools were opened September 5, 1864.

It is intended for day scholars only.

The act of incorporation provides that "no student of said College shall be refused admission to, or denied any of the privileges, honors or degrees of said College on account of the religious opinions he may entertain."

Courses of Study—To the original classical course was added, September, 1879, at the special instance of the Most Reverend Archbishop, a department in which the study of the ancient languages is superseded by exclusive application to English, the modern languages and the sciences. This course is intended to offer the advantages of a thorough English and business education to that large class of our youth, who, not intending to follow the professions, stand in no immediate need of classical training; but for whom it is of such vast importance that they be well grounded in their faith, and spend a few years, at least, under healthy religious influence. It is hoped that the friends of the College will call the attention of the large number of the community, who have sons intended for business, to the fact that a first-class business, literary, and Catholic education may be had in the English and Commercial course at Boston College.

Matriculation.—On admission, the pupil is examined, to determine what classes he should enter; and no student shall be promoted from any class till his progress justifies advancement. To prevent exclusive devotion to one pursuit, it has been found necessary, for culpable failure in one branch, to refuse promotion in all the rest. Nevertheless, on account of age, or peculiar circumstances, exemption from certain studies is sometimes conceded; in which case, the scholar is placed "out of course," and is not reckoned as a candidate for honors or for graduation.

Degrees.—The Degree of A. B. will be conferred on those students who have completed successfully the classical course and complied with the other regulations prescribed. To obtain this degree it is always necessary to have spent at least the last year of the course in this institution.

For the further degree of A. M., it will be required that the applicant shall have continued his studies in College for one year, or studied, or practiced a learned profession for two years.

Sessions.—The first session begins on the first Monday of September; the second, on the first Monday of February; but students are not precluded from entering at other times.

Order of the day.—The hours of class are from 8.30 A. M. to 2 P. M., with short recesses at convenient intervals. Special arrangements with the Prefect will be necessary, in each individual case, to excuse later arrival.

The first half-hour of each day is occupied in attendance at Mass. It is scarcely necessary to impress on Catholic parents the importance of this salutary practice One hour a day is devoted to Arithmetic or Mathematics; two hours a week, to the study of modern languages; and the rest of the time, with the exception of that devoted to lectures on religious or other topics, is spent in the principal class of Latin, Greek or English.

Marks.—For each memory lesson, according to its excellence, the scholar receives a mark, grading from ten down; if the recitation be a translation, the mark is twice counted; and for Themes or Compositions, it is counted three times. As the labor of preparation of these various exercises, and their relative importance, are consid-

ered to be to each other as one, two and three. At the end of each month, public proclamation is made of the average of all marks, in the separate departments of Classics, Mathematics and Modern Languages. The average of these monthly averages is what is termed the average of monthly results; at the middle examination, averages are given in like manner for the various branches, and a common examination average struck. To obtain the term average, that of the monthly results and of the examination are added, and their sum divided by two. In the second term or session the same method is followed, and the year's results are seen, in the average resulting from the combination of those of the two terms. According to this average of results for the year, commencement honors, grade and promotions are determined.

Religious Discipline.—The moral and religious part of education is considered to be incomparably the most important. Catholic students, if not excused for good reasons, will be required to be present at Mass every day, to recite the daily catechetical lesson, to attend the weekly lecture on the doctrines of the Church, to make the annual retreat, to present themselves to their confessor every month, and, if they have not received the Sacraments of Penance, Confirmation, or Holy Eucharist, to prepare for their reception.

Holidays.—The following are the ordinary holidays:—
Every Saturday;
The days of a session remaining after the close of an examination;
All the holy days of obligation;
From the 23d of December to the 2d of January;
From Wednesday in Holy Week to Wednesday in Easter Week;
The Feasts of St. Patrick and St. Aloysius;
Fast Day, Decoration Day, Thanksgiving Day.

Attendance will be required, for a short time, on the first and second Saturdays of the month; not for class recitations, but for certain religious or literary exercises. For absence on these days, only grave reasons will be received as excuse.

Terms.—The terms are thirty dollars per session of five months, payable in advance; besides the fee of ten dollars for the diploma, and five dollars, during the Philosophy year, for laboratory expenses,

there will be no further charges made by the College.

N. B. All bills must be settled before graduation.

Rules.—On arriving at the College, the students will repair immediately to the cloak-room where they will deposit their books, overcoats, etc.; thence they will proceed directly to the gymnasium, where they will remain till time for Mass.

Those who are not required to be present at Mass, if they arrive during Mass, will remain in the gymnasium.

The places for recreation are the gymnasium and the court. All the rest of the premises are "out of bounds."

Playing ball, snowballing, pitching, and all games that endanger windows are prohibited.

Whoever damages the College property must make compensation.

No boisterous conduct is allowed in the corridors or class-rooms at any time. Even in the gymnasium, and during recreation, the behavior should be decorous.

In fine, any conduct unbecoming the character of a gentleman will be regarded as a violation of the College rules.

Religious motives being habitually appealed to, little need has been experienced of frequent or severe punishment.

Flagrant offences, such as are detrimental to the reputation of the College, or are obstructive of the good of other pupils, are grounds for expulsion.

For faults of ordinary occurrence, such as tardy arrival, failure in recitations, or minor instances of misconduct, detention after school or the task of copying or committing to memory some lines of an author, is usually found to be sufficient penalty.

To Parents.—The efforts of teachers and prefects will be much facilitated, if the co-operation of parents can be secured.

Parents are, therefore, earnestly requested to insist upon daily study at home, for two or three hours, at least; to notify the Prefect speedily in case of the detention or withdrawal of their sons, of necessary detention from, or tardy arrival at school; of failure to receive the monthly bulletin; to attend to notifications, always sent by the Prefect the second day of an unexplained absence, or for lessons signally bad during a considerable length of time; and not to pass over without inquiry averages falling below seventy-five. It is

respectfully asked that parents be prompt in answering notes sent them by college officers.

Acknowledgments.—Grateful acknowledgment is made of books, mineralogical specimens and other gifts, received during the year, from the Department of the Interior, Smithsonian Institute, Hon. P. A. Collins, Hon. Leopold Morse, D. H. Tully, Bureau of Education, Mrs. Higgins, Young Men's Catholic Association.

Essays and Experiments

By Members of the

Classes of Physics and Chemistry,

COLLEGE HALL,

THURSDAY EVENING, JUNE 18, 1885.

INDUCTION BY CURRENTS, DANIEL M. MURPHY

Electricity statical and dynamical. Franklin's theory. Induced Currents. Their utilization in Ruhmkorff's Coil. Experiments:— Gunpowder, ether, phosphorus and gas ignited; hydrogen aud oxygen made to combine chemically; Geissler tubes illuminated; spark in vapor of turpentine, Leyden battery charged, etc.

COMBUSTION, JOHN J. RYAN

Theories of Combustion, old and new. Relation of combustion to light and heat. Solid particles necessary for luminosity of flames; these particles in ordinary flames are furnished by carbon or its compounds. The more carbon a body contains, the more air is required for its complete combustion. Object of chimneys. Difference of bodies in kindling temperature. Oxygen of combustion supplied either directly or by means of oxygen compounds.

Assistants, DANIEL P. SCANNELL
